

Compatible

I.S. mounts with separate tabs that extend out from the frame/fork are usually compatible.

Not Compatible

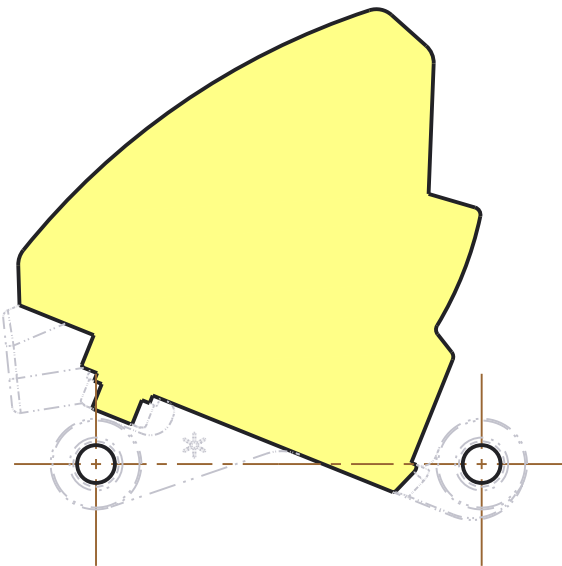

Some I.S. mounts do not have enough clearance to work with our adapters.

Scale Drawing

Use this drawing to check if our adapter will work with your frame/fork. Print this on "A4" size paper and make sure you use "Actual Size" or "100% Zoom".

Line it up with the holes in your frame/fork to check for interference.

Paper Size
