

## Compatible

I.S. mounts with separate tabs that extend out from the frame/fork are usually compatible.

## Not Compatible

Some I.S. mounts do not have enough clearance to work with our adapters.

## Scale Drawing

Use this drawing to check if our adapter will work with your frame/fork. Print this on "Letter" size paper and make sure you use "Actual Size" or "100% Zoom".

Line it up with the holes in your frame/fork to check for interference.
